

American Society for Cybernetics

The Wiener Gold Medal of the American Society for Cybernetics
is awarded to

Pille Bunnell

for outstanding and profound lifelong contributions to both cybernetics and the ASC.

A pioneer in insisting on the significance of ecosystems, Pille Bunnell brought to cybernetics a sensitive understanding of responsibility, autonomy, interdependence and love, that takes cybernetics back to its early concerns with ecology and forwards to a redefinition of the cybernetic way of being.

Pille Bunnell made a major contribution to the ASC, bringing new life to the society, connecting it to the internet age. The society recognises this significant contribution to cybernetics, and her work in reshaping the ASC in the connected cybernetic form of the internet age.

Louis H. Kauffman
