

American Society for Cybernetics

The Wiener Gold Medal of the American Society for Cybernetics
is awarded to

Humberto Maturana

for outstanding and profound lifelong contributions to the nurturing of cybernetics.

The Wiener Gold Medal of the American Society for Cybernetics is awarded to Humberto Maturana for outstanding lifework in cybernetics and its relationship with biology and epistemology.

Maturana's profound evocation of a deeply coordinated evolving biological universe has changed our view of the natural world and the meaning of the search for knowledge in of that world. His view of the flow and evolution of language as a coordination of coordinations of coevolving organisms brings forth insights that will inform the development of cybernetics into the unknown future.
