

American Society for Cybernetics

The Wiener Gold Medal of the American Society for Cybernetics
is awarded to

Ricardo Uribe

for outstanding and profound lifelong contributions to the nurturing of cybernetics.

The Wiener Gold Medal of the American Society for Cybernetics
is awarded to Ricardo Uribe for outstanding
lifelong work in the foundations of cybernetics and its
relationships with engineering, epistemology and biology.

Ricardo Uribe has been a keen and unorthodox observer/participant
in the worlds of invention, education and experimental epistemology
from the inception of second order cybernetics.

His "Tractatus Paradoxico-Philosophicus" is the cyberneticians
guide to radical epistemology.

His seminal work with Humberto Maturana and Francisco Varela on autopoiesis
forms the foundation of present-day cybernetic praxis.

We are honored to be able to present this award to him.

Louis H. Kauffman
President of the American Society for Cybernetics
